DETAILED ACTION

Claim 2 is objected to because it ends with two periods.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Thomason(5,207,153).

The patent to Thomason teaches the structure of a digital can printing apparatus for printing on a circular objects 36 as claimed, comprising a printer 16 of an inkjet type for digitally printing of an image on the objects, and an object transporter 11 and 12 for transporting the objects 36 in front of the printer 16 and in registered alignment between each object 36 and the printer 16 and for rotating the individual objects 36 in front of the printer 16. See Fig. 1 and column 2, line 27 through column 3, line 25 for details.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 2-24 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 2-24 of prior U.S. Patent No. 6,769,357. This is a double patenting rejection. Claim 2 of the present application contains all of the limitations of claim 1 and thus makes it identical in scope with claim 2 in the patent. Claims 3-24 are identical to claims 3-24 in the patent. Accordingly, claims 2-24 of the present application claim the same invention as that of claims 2-24 of the patent.
